Amy

Project Title: Charity Foundation

This is to certify that the project work is submitted by the student(s) named above in May 2022. It is qualified and approved by the following persons and committee.

Head of the Dept.

Tasnim Jahan

Assistant Professor & Head

Department of CSE

North East University Bangladesh

Supervisor

Al Mehdi Saadat Chowdhury

Assistant Professor

Department of CSE

North East University Bangladesh

Project Description

The main purpose of developing the charity foundation system is for the social welfare. It expresses a nonprofit's motivations and the worldview under which a nonprofit operates. It helps define the operational culture for employees and volunteers, as well as for donors. This project is intuitive and user friendly. Major users in this system: unregistered user, registered user, admin, manager, finance, volunteer. Unregistered users can view basic information. A person who wishes to donate he must register before login. Admin can control all functionalities of website. He can add or delete information, manage all data regarding the social service and stuff description. Managers can be able to create and manage events, and manage volunteer teams. Finance has a record of all expenses and donations. Manager and finance are bound to the admin to submit their reports of the sector they are responsible for. Volunteer teams usually complete the requirements and performing field work.

CHAPTER 1

INTRODUCTION

Nowadays, the number of underprivileged children and unemployed people in our country is increasing. We are working on this project to create a reliable way to help them. This system will raise funds, storing records about all transactions and distribution. Using these records the system will improve its strategy additionally.

1.1. Project Motivation and Target User Groups

Some of our friends together often collect funds for various social causes. Which have no proper documentation and records. So later we have to face many issues regarding finance. We also notice that many NGOs and charitable organizations process their work using pen and paper. There is a possibility of data loss. In the absence of proper documentation, it is not achievable to deliver the necessary assistance to the person seeking help in an adequate manner. We wanted to reform this process through online. So the management and storing records can be much easier and more efficient.

Charitable organization microcredit receiver and donor will use our website. The donor can donate with the assurance that his donated money will be handover to any needy people. Organizations can track all expenses and records for present and future issues.

1.2. Similar Products and their features

Write an introductory paragraph first. In this section you will create several subsections, each outlining one product and its features.

1.2.1. Online Charity Management System

Online Charity Management System is a software solution for a nonprofit organization. It manages the charitable donations and also the donor base. Such a system includes features such as electronic fund transfer, donation management, fundraising, donor management, and event management.

There are certain key features:

- Easily track donations and donors.
- Send gift messages to donors.

- Set up recurring payment plans.

1.2.2. TigernixCharity-Charity Management System

TigernixCharity online donation and membership software is designed to focus on catering to the needs and requirements of charity, foundation and church groups/agencies. TigernixCharity is a web-based relationship management solution that also caters to non-profit and non-governmental groups/agencies. It has special features that enhance community participation, supports multi-site organizations and networks, stores and manages information on donors/individuals as well as organizations. TigernixCharity helps to maintain and manage various records and details such as correspondence and transactions. It is a powerful contact, fundraising, and donors and volunteer relationship system that helps to manage donors, employees, volunteers, and more.

There are certain key features:

- Document Management
- Event Management
- Survey management
- Get reports on their donations.

1.2.3. Similar Product 3

Online Charity Management System project which helps to raise funds online, Online appointment feature for birthday party or any other activities, Online Children adoption service and many more. Even if any food item remains in any function people can send requests to charity. Charity employees can check all kinds of reports after the login. This provides and supports efficient and effective fundraising activities. This project will help management to find donors easily.

There are certain key features:

- Online Children adoption service.
- People can send requests to donate any reusable object or item.
- Donors or public visitors can view all the information about charity through online.

1.2.4. Brac.net

They use the microfinance groups as a social platform to deliver scaled-up services in health, education, business development and livelihood support. These are all critical components needed to ensure that people can break out of the cycle of poverty. They alleviate poverty and encourage economic participation by empowering people through social and economic programs.

There are certain key features:

- Health and education development
- Microfinance
- Women & Youth empowerment
- Poverty alleviation.

1.3. Features of our product as Requirements:

In this section include both functional and non-functional requirements of your product.

1.3.1. Functional Requirement:

- Registration: Unregistered user can register.
- Login: Admin, manager, finance, volunteer, user can login.
- Unregistered User:
 - View custom information about this website.
 - Donate to charity fund.
- Registered User:
 - View event information, participate an event as a volunteer.
 - Apply in a job post.
 - View and update his profile information.
 - Apply for adopt, sponsor an orphan child.
 - Give their review and rating about the organization service.
 - Donate to charity fund.
- Admin:
 - Create and manage blog posts.
 - Create and manage image gallery.
 - Create job post, view applicant list.
 - View message from contact.
 - Preview, Accept/reject visitors request.
 - View and delete Stuff information.

- View all transaction history and donor information.
- Manager:
 - Create and manage orphan record.
 - Create and manage old age home information.
 - Create, view and manage blood bank information.
 - Create, view and manage medicine corner information.
 - View record of all donated stuff.
 - Create and manage events, assign a coordinator for event from volunteer list.
 - View all transaction history and donor information.
 - Track expenses at the orphanage center.
 - Manage items required by the Orphanage center.
 - Review loan request and client status.
 - Create an audit report.
- Finance:
 - Record donations when donors donate successfully.
 - Track expenses at organizations that have been provide.
- Volunteer
 - Perform responsibility they're assigned by coordinator.
 - Volunteer assigned for event coordination will create a budget for the event.
 - Collect loan request and client information.
 - Submit records to the manager

1.3.2. Non-functional Requirement:

1. Availability: The system will be available 24 hour.
2. Usability: The system is easy to use. The system responses at the time.
3. Security: The system should be encrypted.
4. Maintainability: The system will track every mistake as well as try to solve the problem as soon as possible.
5. Reliability: The system will not fail.

Note that, we have a separate chapter for requirement analysis. However, you should include a summary of product requirements in the introduction chapter itself.

CHAPTER 2

REQUIREMENT ANALYSIS

In this section we will show the user roles and the product backlog.

2.1. User Roles

Table 1: User Roles Table

User Type	User Description
Admin	Admin can control all functionalities of our website. He can add or delete information, manage all the social service categories, stuff description and data. Similarly he can also be able to manage events. Create job post, receive email from job applicant.
Unregistered User	Without registration process they cannot access further functionalities as- job apply, participate in an event and work as a volunteer.
Registered User	Registered user can be a member of this organization. So they can apply for job and participate in any event.
Volunteer	Registered user can join volunteer team by completing requirement and perform on field work.
Manager	Manager can be able to create and manage event, manage volunteer team.
Finance	They have record of all expenses and donations.
Donor	Unregistered/registered user can donate, his record will be saved as donor.

2.2. Product Backlog Items:

User can register. Annotation: User = Unregistered user. Estimation: 4 Priority: 5	1) Must enter valid email Id (pass) 2) Must enter valid password (pass). 3) Try to register without entering Relevant information (fail).
--	---

User can login. Annotation: User= admin,	1) Invalid user id and password(fail) 2) Try to login before registering
---	---

<p>manager, finance, volunteer, registered user.</p> <p>Estimation: 4 Priority: 5</p>	<p>(fail).</p> <p>3) Try to view information before login (fail).</p>
---	---

<p>Organization's related blog posts and articles added by admin will be posted in the blog section, any user can view those posts.</p> <p>Annotation: User= registered user.</p> <p>Estimation: 4 Priority: 5</p>	<p>1) Already login successfully (pass)</p>
--	---

<p>Volunteer teams provide food and education for street children.</p> <p>Volunteer team will decide location and children number and submit those records to the manager.</p> <p>Annotation: User= Volunteer.</p> <p>Estimation: 4 Priority: 5</p>	<p>1) Login successfully as a volunteer (pass)</p>
---	--

<p>Managers record orphans based on their name, gender, age, date they arrived</p> <p>Annotation: User= Manager.</p> <p>Estimation: 4 Priority: 5</p>	<p>1) Duplicate data entered (fail)</p>
---	---

<p>Parents who wish to adopt a child can accept an orphan child from here following legal policy through our website. a legal advisor can view these documents.</p> <p>Annotation: User=Registered user</p> <p>Estimation: 4 Priority: 5</p>	<p>1) Unable to contact with proper document. (fail)</p>

organization.	2) Check user role as manager (pass)
---------------	---

Emergency medicine service for organization.	1) Duplicate data entered (fail) 2) Check user role as manager (pass)
--	---

Old age home for old people to provide them a secure place to live, medical report	1) Duplicate data entered (fail) 2)Check user role as manager (pass)
--	--

Volunteer teams provide food and education for street children. The volunteer team will decide location and children number and submit those records to the manager. Annotation: User= Volunteer. Estimation: 4 Priority: 5	1) Empty dataset (fail) 2) Not approved by manager(fail)
---	---

Provide food and shelter for orphan children.	1) Empty data (fail) 2) Editing Without add data(fail)
---	---

Manage record of all products required for orphanage home. Donor can also donate specific products. Annotation: User= Manager. Estimation: 4 Priority: 5	1) Editing record Without add any record(fail) 2) Edit without clicking the save button (fail). 3) Try to remove a non-existing data.(fail)
--	---

Hospital service for organization. The manager will be able to organise new events, delete events and update events details and set	1) Duplicate data entered (fail) 2)Try to remove a non-existing data.(fail)
---	--

priority of events and assign a coordinator for the event.	
--	--

The manager will be able to organize new events, delete events and update events details and set priority of events and assign a coordinator for the event.	1) Registered as manager(pass) 2)Approved by admin(pass)
---	---

Coordinator will be able to share event information with the event's registered members and create a volunteer team for a particular event along with their responsibility and making a budget for the event.	1) Coordinator assigned by manager(pass) 2) Budget and team approved by manager(pass)
---	--

Admin has recordings of staff description, worker's information and visitations.	1) Duplicate data entered (fail)
--	----------------------------------

Parents have to chat with our legal advisor with proper documents. Contact with the organization through chat.	1) Duplicate data entered (fail)
--	----------------------------------

Registered members can participate in events and work as a volunteer by filling up a form. Event coordinator can approve/reject his request.	1)Request rejected by manager (fail)
--	--------------------------------------

Visitors will take appointments to visit. Admin will preview the request, admin can reject/accept the appointment.	1) Request rejected by admin (fail)
--	-------------------------------------

Admin can create job posts for hiring office staff. view applicant list	1) Duplicate data entered (fail)
Applicants can apply for the required position to the admin.	1) Not yet registered (fail) 2) Successfully login as registered user(pass)
Search bar for users, so they can search for required information..	1) Invalid data entered ,except any letter(fail) 2)Not matched with data(fail)
The manager should track expenses at the orphanage centre, and should have a requisition form of items required by the Orphanage centre.	1) Duplicate data entered (fail)
Micro finance project at low interest for people to be self-sufficient. Field workers will collect information about clients, loan distribution, collect debt. They will submit those information to the manager.	1) Duplicate data entered (fail) 2) Empty data field(fail) 3) Invalid data(fail)
Registered user can view and update his profile information	1) Not registered yet (fail) 2)Enter wrong email,name,phone or other information(fail) 3) Already logged in his account(pass)

The manager assigned for the microfinance project can review loan requests and client status which are submitted by field workers. They can create an audit report.	1) Field worker doesn't send valid information (fail) 2) Data inconsistency, redundancy occurred (fail)
---	--

Sponsor a child. Create a request to sponsor him.	1) Not approved by admin (fail)
---	---------------------------------

Finance should record donations when donors donate successfully and track expenses at organisations that have been provided. Admin has tracked all expenses and records of donations which were provided by finance. Annotation: User= Finance. Estimation: 4 Priority: 5	1. Check registration and login completely and check user role as finance (pass) 2. Donation transaction done successfully (pass) 3. Manager records successfully (pass)
---	--

User can give their review and rating about the organisation service	1) Not a registered member (fail)
--	-----------------------------------

Unregistered or registered user/member can donate to charity funds through mobile banking (bkash).	1) Invalid mobile number (fail) 2) Account does not have sufficient balance (fail)
--	---

Provide education for orphanages.	1) Duplicate data entered (fail) 2) Empty record (fail)
-----------------------------------	--

CHAPTER 3

PLANNING

This section contains the increment that we will do over the semester.

3.1. Scrum Increments

In total, you will create 4 Scrum increments to be presented respectively in – 4th year 2nd semester pre-presentation, 4th year 2nd semester final presentation, 4th year 3rd semester pre-presentation, 4th year 3rd semester final presentation.

3.1.1. Scrum Increment #1

Table 2: Scrum Increment #1

User Story	Responsible Member
Landing page of the website contains formal information about their activities and service, and grows careers as volunteer members. Also contains. Events, Gallery, Team, Contact us, options for login/registration. Unregistered users can only access the landing page and its content.	Moriom
Organization's related blog posts and articles added by admin will be posted in the blog section, any user can view those posts.	Moriom
Unregistered users can register. Registered users can login through the login page.	Humayra
Managers record orphans based on their name, gender, age, date they arrived	Humayra
Emergency blood bank for organization.	Nusrat
Emergency medicine service for organization.	Nusrat

3.1.2. Scrum Increment #2

Table 3: Scrum Increment #2

User Story	Responsible Member
Volunteer teams provide food and education for street children. Volunteer team will decide location and children number and submit those records to the manager.	Moriom
Manager will be able to organize new events, delete events and update events details and set priority of events and assign a coordinator for the event.	Moriom
Old age home for old people to provide them a secure place to live, medical report. records based on their-name, gender, age	Humayra
Hospital service for organization.	Nusrat
Registered members can participate in events and work as a volunteer by filling up a form. Event coordinator can approve/reject his request.	Moriom

3.1.3. Scrum Increment #3

Table 4: Scrum Increment #3

User Story	Responsible Member
Provide food and shelter for orphan children.	Humayra
Manage record of all products required for orphanage home. Donor can also donate specific products.	Humayra
Parents who wish to adopt a child can accept an orphan child from here following legal policy through our website. a legal advisor can view these documents.	Nusrat

Parents have to chat with our legal advisor with proper documents. Contact with the organization through chat.	Humayra
Coordinator will be able to share event information with the event's registered members and create a volunteer team for a particular event along their responsibility.	Moriom
Admin has recordings of staff description, worker's information and visitations.	Nusrat
Search bar for users, so they can search for required information.	Moriom

3.1.4. Scrum Increment #4

Table 5: Scrum Increment #4

User Story	Responsible Member
Visitors will take appointments to visit. Admin will preview the request, admin can reject/accept the appointment	Nusrat
The manager should track expenses at the orphanage center, and should have a requisition form of items required by the Orphanage center.	Nusrat
Micro finance project at low interest for people to be self-sufficient. Field workers will collect information about clients, loan distribution, collecting debt. They will submit those information to the manager.	Moriom
Admin can create job posts for hiring office staff, view applicant list.	Humayra
Applicants can apply for the required position to the admin.	Humayra
Sponsor a child. Create a request to sponsor him.	Humayra

Registered user can view and update his profile information.	Nusrat
The manager assigned for the microfinance project can review loan requests and client status which are submitted by field workers. They can create an audit report.	Moriom
Finance should record donations when donors donate successfully and track expenses at organizations that have been provided. Admin has tracked all expenses and records of donations which were provided by finance	Nusrat
User can give their review and rating about the organization service	Humayra
Unregistered or registered user/member can donate to charity funds through mobile banking.	Moriom
Provide education for orphanages.	Nusrat

CHAPTER 4

MODELING AND DESIGN

In this section we will show the ER diagram and the other UML diagram required in our project. The ER diagram represents real-world entities and the relationships between them. ER Modeling helps in analyzing data requirements systematically to produce a well-designed database. UML is a modeling language used by software developers. UML diagrams are to allow teams to visualize how a project is or will be working.

4.1. teams to visualize how a project is or will be working. The Entity Relationship Diagram

CHAPTER 5

CODING AND TESTING

5.1. Project Screenshots with Explanation

Registration:

This page is a user's login page. Users enter her valid username, password and current information. After login he/she can view his dashboard. If a user enters an invalid username or password then he/she can receive an error message.

The screenshot shows a user registration form titled "Administrator". The form consists of five input fields: "Name", "Address", "Email", "Password", and "User Type". Below the "User Type" field is a dropdown menu set to "User". At the bottom are two large green buttons: "Signup" with a right-pointing arrow icon and "Login" with a right-pointing arrow icon.

Name	<input type="text" value="Name"/>
Address	<input type="text" value="Address"/>
Email	<input type="text" value="Email"/>
Password	<input type="text" value="Password"/>
User Type	<input type="text" value="User"/>

Signup

Login

Figure-7: User Registration

Admin Login:

Admin can login through this page.admin enters her valid username and password . After login he can view his dashboard. If an admin enters an invalid username or password then he can receive an error message.

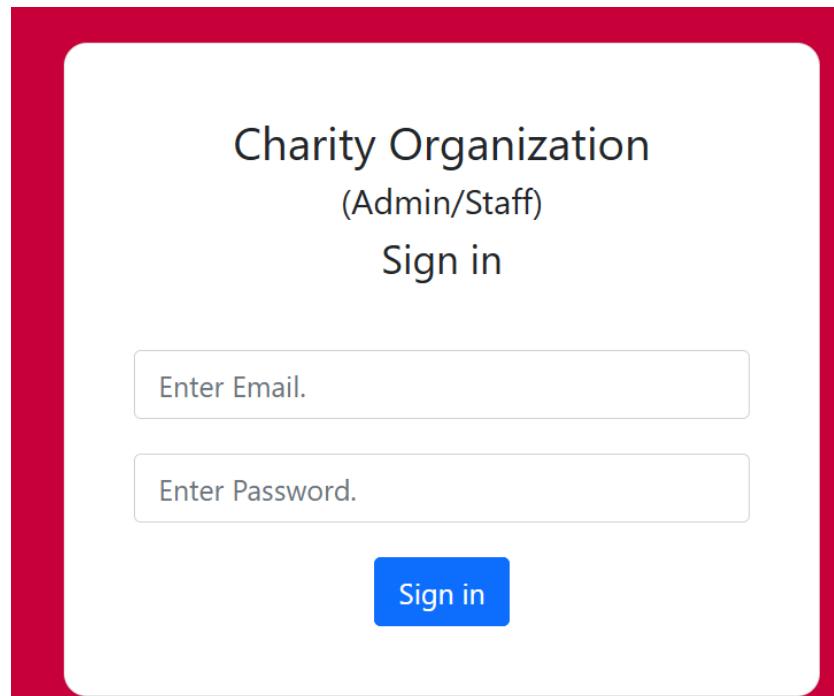

Figure 8: Admin Login

Login:

Registered users can login to the website through the login page. use renters her valid username and password .

A screenshot of a user login form. The top section has a blue header with the word "Administrator" and a "User login" button. The main body is white and contains two input fields: one for "Username" and another for "Password". Below the password field is a green "Login" button with a right-pointing arrow icon.

Figure-9: User Login

Orphan record:

Children record details page. Admin can view all user details list of his website users. Here including users name, age, gender, address .He cannot change any information.

The screenshot shows a web application interface titled "Orphanage Home". On the left, there is a sidebar menu with the following items: Dashboard, Accounts (Administrator), children, child, Old Age Home, and Old people. The main content area has a header "child Record" and a table titled "child Record". The table lists four records with the following data:

ITR No	Name	Age	Gender	Address	Action
12345	MoriorJahan	8	Female	moulovibazir	<button>Delete Records</button>
1234	mubassirkhanom	8	Female	Bianibazir	<button>Delete Records</button>
23	DipuAhmed	10	Female	Bianibazir	<button>Delete Records</button>
1234	NipulZaman	12	Male	bianibazir	<button>Delete Records</button>

Figure-10: Orphan record

Add Orphan Information:

Admin add children including ITR No, first name, last name, others information. Then save all information.

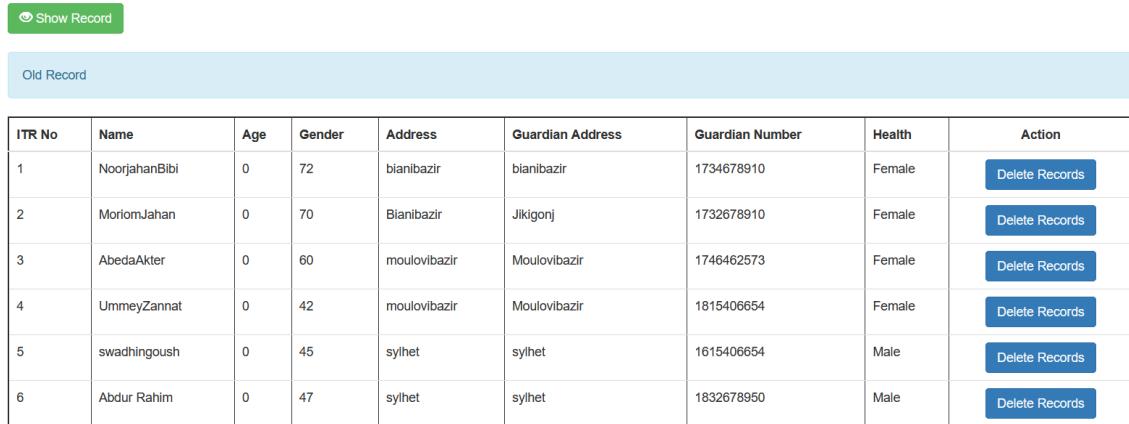

The screenshot shows a modal dialog titled "ADD Children INFORMATION". The form contains the following fields:

- ITR No: (input field)
- Firname: (input field) and Lastname: (input field)
- Birthdate: (dropdown menus for month, day, year)
- Address: (text input field)
- Age: (input field)
- Gender: (dropdown menu with option "-Please select an option-")
-

Figure-11: Orphan Information

Old age home record:

All old age people record. Admin can view old record information such as name, age, gender, address, guardian address, guardian number. When clicking the delete button then open a new page .When delta this button then a confirmation delete message & confirm it then delete.

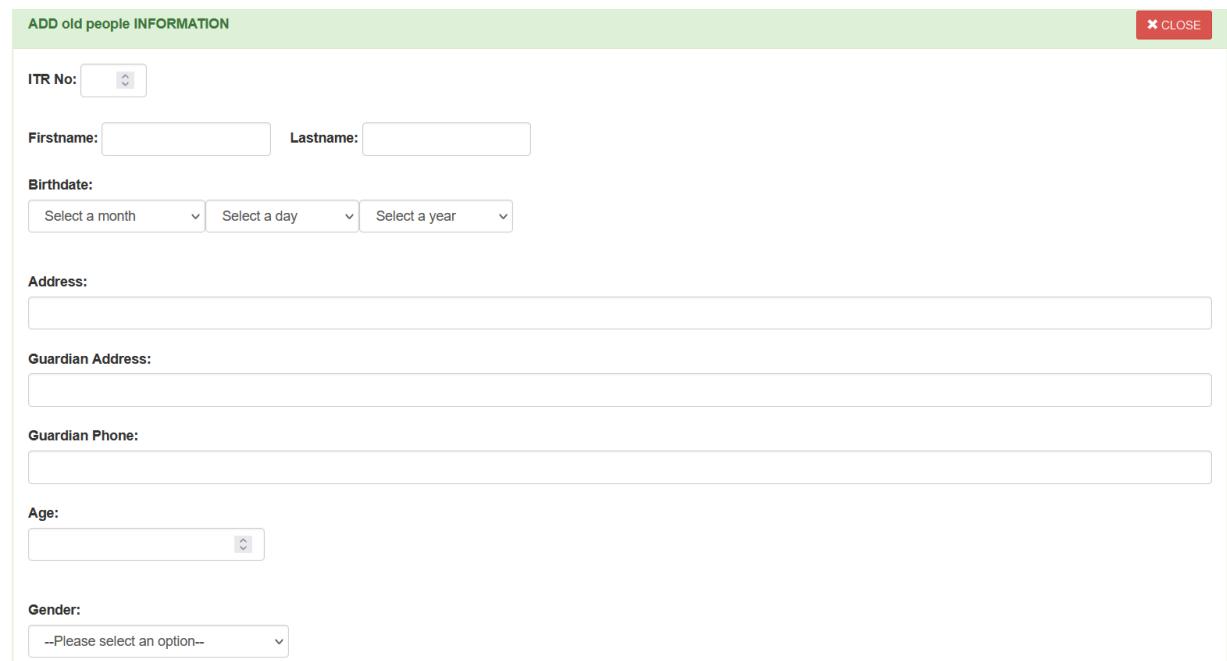

ITR No	Name	Age	Gender	Address	Guardian Address	Guardian Number	Health	Action
1	NoorjahanBibi	0	72	bianibazir	bianibazir	1734678910	Female	<button>Delete Records</button>
2	MoriomJahan	0	70	Bianibazir	Jikigonj	1732678910	Female	<button>Delete Records</button>

6	Abdur Rahim	0	47	sylhet	sylhet	1832678950	Male	<button>Delete Records</button>

Figure-12: Old age home record

Add Old Age People:

Admin can add old age people. Admin add including ITR No, first name, last name,address, birthdate, age, gender others information. Then save all information.

The form is titled "ADD old people INFORMATION" and includes the following fields:

- ITR No: A dropdown menu.
- Firstname: A text input field.
- Lastname: A text input field.
- Birthdate: Three dropdown menus for month, day, and year.
- Address: A text input field.
- Guardian Address: A text input field.
- Guardian Phone: A text input field.
- Age: A dropdown menu.
- Gender: A dropdown menu with the placeholder "Please select an option".

Figure-13: Add Old Age People

Admin Dashboard:

This is the admin landing page where admin can see the all details about the organization. Admin view recent donor name, phone, amount, date.

The dashboard displays the following information:

- Charity Organization:** CHILDREN'S MANAGEMENT, EDUCATION MANAGEMENT, EVENTS MANAGEMENT, JOB MANAGEMENT, DASHBOARD, STAFF DESCRIPTION, WORKER INFO, DONOR INFO.
- Dashboard Summary:**
 - 3 Staff (User icon)
 - 1 Worker (User icon)
 - 14 Donor (User icon)
 - 96822TK Donation Amount (Hand icon)
- Recent Donations:**

User Home Page:

After performing the required sign-up/sign-in functionality, user will referred at the home page. The home page has detailed organizational description, their work pattern. This is the also work as a communication medium with other users. The home page consists of several subsections- blog page, gallery page, contact page.

Sponsor a Child

Sponsor a child whose story, interests, and circumstances resonate with you & give him/her a greater chance at escaping poverty by getting a quality education.

Impact

Together we've impacted the lives of over 4500 vulnerable children & their families by providing quality education along with tools to overcome poverty.

Donate

Very often the improvements we make may not show results right away. It's important to stay resilient and always ask ourselves - what's that one thing we can do better today.

Collect Borrower Info:

This organization has a loan facility. But for that, the volunteers have to collect the client's information. The volunteers will collect information through a form, where the name of the borrower, contact address, phone number, email, account, tax ID and NID will be taken. These are the collected information will be stored in database for the convenience of further use.

The screenshot shows a form titled "Add New Borrower". It contains fields for First Name, Last Name, Email, Password, Address, Contact, Account No., Tax ID, and National ID. Each field is represented by an input text box. Below the input fields is a "Add" button. At the top of the form, there are links: Add Info, View Info, All Details, and Event Updates. There is also a "View List" link at the bottom left of the form area.

3	Efat	Thank you	
4	Olive	Hello	

ID	Volunteer Name	Contact	Location	Action
8	Olive	938478762	Sylhet	<button>View</button>

Figure-92: Assigning Volunteer Team

The screenshot shows a budgeting interface. On the left, a sidebar menu includes links for Overview, Event History, Task List, Volunteer List, and Check Loan. The main content area has two sections. The top section is titled "Insert Item" and contains a form with fields for "Item Name", "Enter Quantity", "Select Unit", and "Approx Cost(tk)". A blue "Save" button is located at the bottom right of the form. The bottom section is titled "Item Data" and displays a table of items with their quantities, units, and approximate costs. The table includes items like vccb, Winter Tent, Winter socks, Winter gloves, Winter hat, Blankets, Drinking water, and Rice.

Item Name	Enter Quantity	Select Unit	Approx Cost(tk)
vccb	4	kg	554
Winter Tent	10	piece	100
Winter socks	20	piece	30
Winter gloves	20	piece	20
Winter hat	50	piece	50
Blankets	50	piece	200
Drinking water	100	bottle	10
Rice	50	kg	500

Figure-93: Budgeting for Event

The screenshot shows an event sharing interface. On the left, a sidebar menu includes links for Overview, Event History, Task List, Volunteer List, and Check Loan. The main content area shows an event titled "Event Title: women enterpreneurship" with the date & time "2022-08-12". Below the title are buttons for "Post" and "task Section". A "Coordinator:" field is followed by a "Member List" field. To the right is a "Share something..." input field and a "Comment something..." input field with a "post" button. There is also a large empty box for additional content.

Figure-94: Share Event related any update

Those who are concerned can see event related post here, which was posted by the event coordinator.

The screenshot shows a website header for "A Non-Profit Charity Organization" with navigation links for Home, Education, Visit, Events, Our Services, Blog, Gallery, Contact, Job, Login, and Donate. Below the header are four event-related posts:

Volunteer Request:

General user can participate in events and work as a volunteer by filling up a form. Event coordinator can approve/reject his request.

The screenshot shows a "Join As Volunteer" form on a website. The form fields include First Name, Last Name, Email Address, Contact Number, and Location, each with an input field. A "Submit" button is at the bottom. The page footer includes a copyright notice: ©2022.

Figure-96: Join as volunteer

The screenshot shows a "Manage Request" table on a website. The table has columns for ID, Volunteer First Name, Volunteer Last Name, Volunteer Email, and Status. Each row contains a green "Accept" button and a red "Reject" button. The data in the table is as follows:

ID	Volunteer First Name	Volunteer Last Name	Volunteer Email	Status
1	Nemo	Nobody	nemo@gmail.com	Accept Reject
2	Lucifer	Chloe	lucifer@gmail.com	Accept Reject
3	Wednesday	Addams	wednesday@gmail.com	Accept Reject
4	Harry	Ron	harry@gmail.com	Accept Reject
5	Tom	Ellis	tom@gmail.com	Accept Reject
6	Sherlock	Watson	sh@gmail.com	Accept Reject
7	Nusrat	Amy	nusrat@gmail.com	Accept Reject
8	humayra	humu	humayra@gmail.com	Accept Reject

5.2. Testing:

Unit Testing:

This is the initial part of testing that is conducted to remove syntax and logic errors from a single unit. Individual components are tested to ensure that they operate correctly.

Integration Testing:

Small chunks of units are integrated to make up the system. Integration testing involves testing of each individual code module and each module's effect on the entire product.

System Testing:

System testing validates the completely integrated software product. The purpose of system testing is to evaluate the entire system specification. This is concerned with validating that the system meets its functional and non-functional requirements and testing the emergent system properties.

Acceptance Testing:

Acceptance testing is a type of testing performed by the end user to verify the software system. It is kind of black box testing, which is performed by user or client. It does not focus on internal structure, code, error fixing. In development phase user provide feedback about product and it help development team to develop their product.

White Box Testing:

We performed white box testing to verify input output flow and improve design, usability and security. In white box testing the code is visible to tester, so mostly this testing part has been done by developer team. We check the source code then create test cases and executes. We have tested a series of predefined inputs against expected or desired outputs so that when a specific input does not result in the expected output, we have encountered a bug.

Black Box Testing:

The main focus of black box testing is on the validation of functional requirements. First we examined the requirements and specifications of the system. We test some random input without knowing the internal functionality and compare the expected output with actual output. There were some errors which we fixed later and re-tested.

Beta Testing:

It is the final prelease of testing. As a rule, it is done by end users. Beta testing replaces the site in the hands of real users outside of our team to discover any weak points from the user's perspective that you would not want to have in your final, released version of the application. Our website was tested by some of our batch mates. Some of the findings are:

- User friendly
- Needs internet access

CHAPTER 6

CONCLUSION

Charity foundation system will be used by social workers. This project expanded as it has potential for improvement. We partially implemented our project. The allocation of donations must be strictly monitored to ensure that it does not end up in the wrong hands. Through

helping another in need, one is able to dignify their own life with the pride of helping someone else. A well-planned and executed trust management communication strategy should have a positive impact on donor trust and donors' perceptions of a charity's trust worthiness.

Ultimately, these outcomes should have a positive impact on fundraising returns. This project we will help orphan child, old age home people. We provide education for orphan children. We record all information of orphan and track record all expenses and donations. We provide food and shelter for orphan children. Parents who wish to adopt a child can accept on orphan child from here legal policy through our website. People visit our site and we create job post for our site for hiring office staff.
